## Stubborn Weight Loss and GMO Connection

Ronald Grisanti D.C., D.A.B.C.O., D.A.C.B.N., M.S.

Is corn a healthful grain or has science created a global toxicity effecting the human population?

Monsanto genetically modified corn to make it produce a toxin that kills the corn borer worm.

**Do you think this toxin has deadly consequences for humans?**

**You bet!**

In March of 2007, scientists reported in the **Archives of Environmental Contamination and Toxicology** the results of the impact GMO (genetically modified) corn had when fed to rats for only 3 months.

### **These results revealed:**

- Increased weight gain
- Liver and kidney toxicity
- 40% increase in triglycerides, which leads to Metabolic Syndrome X, diabetes, and heart disease.

Now we all need to know that us humans just don't eat plain GMO corn products, but instead we consume products with corn sweetener which is found in commercial salad dressings, breads, snacks, sodas, and all sorts of processed foods, even tonic water.

Remember much of corn is changed dramatically in the factory into high fructose corn syrup.

Modified corn is an **abnormal molecule** for the body that will **contribute to the obesity epidemic**.

Dr. Norm Childers, the Ph.D. who discovered the relationship between human arthritis, tendonitis and dietary nightshade foods (tomatoes, potatoes, peppers, eggplant) has seen that GMO corn may in fact lead to rectal bleeding, irritable bowel, joint pain that comes and goes, and arthralgias of all types.

The bottom line is foods that have been genetically altered are considered **foreign to the human body and will behave differently than natural grown foods**. This genetically changed food has long term detrimental health consequences.

These foods damage the chemistry for weight loss.

The bottom line would be to try to avoid anything with high fructose corn syrup, corn sugar or corn syrup in the ingredients.

**Hi It's Dr. Marc**

**The bottom line here is that our food can be considered alive or dead. Depending on its processing, it can either help regenerate our bodies or drain it of its vitality and create other cells which are injurious to us.**

**It would be our pleasure to address your eating with you. After all, there is possibly some tissue which has not been created exactly like you would like it. Energetic medicine can be of help.**

**As far as your diet is concerned, Jeanne is excellent at helping you**

prepare a healthy diet for you and your family.

### **Jeanne - Office Manager**

Jeanne has been working with Dr. Marc for 35 years. What started out as a temporary position has grown into a life long career. Jeanne's goal is to help the office run smoothly and to help educate people on healthier eating habits. She has two adult daughters who were raised in the office and most of what she learned about healthy eating was to benefit them.

### **Serah - Technical Assistant**

Serah is Dr. Marc's exclusive technical assistant and her job is to work with Dr. Marc to ensure that the patients get the best care possible. She served as a healthcare specialist/ combat medic for six years in the military and has worked in multiple medical fields alongside doctors and other professionals.

### **Michelle - Administrative Assistant**

Michelle was raised in Marshville, Wisconsin. She attended the

University of Wisconsin - Madison and studied Psychology and Elementary Education. I loved to work with children and I felt that these specialties would help children sort through their problems in life. I was fortunate to find a teaching position for nine years.
